Benjamin Orban

[Contact Information](#)

Seasoned Software Engineer with over nine years of specialized experience in enterprise software development and a total of 15 years in the technology sector. Proficient in employing DevOps, Agile, and Scrum methodologies to optimize operations and minimize lead times. Expert in Java with a broad exposure to multiple other languages and frameworks. Proven track record in delivering innovative solutions to complex technological challenges. Seeking an opportunity to leverage my extensive technical skills to drive growth and efficiency in a forward-thinking organization.

Technical Skills:

Expert

- Java, HTML, CSS, Git

Advanced

- JavaScript, JSP, Jakarta EE, JSF, IntelliJ, Jenkins, Weblogic, Linux, Maven

Intermediate

- PHP, BASH, PL/SQL, Spring Boot, ReactJS, Oracle DB, Postgres, Gradle, Junit

Entry-Level:

- MongoDB, Selenium, AWS (EC2, S3, Lambda, Route 53, IAM, CloudFront)

Professional Experience:

CACI Federal, February 2020 - present and May 2015 - February 2016

Systems/Software Engineer T3

- Solicited new business with the USMC within the GCSS-MC program. The proof of concept supplied demonstrated the ability to submit in the field logistics tracking tasks while operating with no network connection.

- Successfully implemented a new claims module within a JSF logistics application. This included leading the integration of a file management feature for customers and government officials to submit, manage, and approve documentation throughout the lifecycle of a claim.

Enterprise Holdings, Inc., February 2016 - February 2020

Software Engineer II

- Implemented new features and resolved bugs within a portfolio of products in the Carshare department, such as API Gateway, Fleet Communicator, Renter Service Integration, Driver Qualification, and Rental Operations.

- I partook in multiple projects for the Daily Rental Operations department, including ECARS to Renter Service, ECARS Legacy Disconnect, PCI Compliance, Truck Telematics, and Central Bulk Payment.

Hudson Bay Company, July 2014 - May 2015

Associate Programmer Analyst

- Maintained the e-commerce platform Sterling OMS and took on release manager responsibilities for customizations to the product. Also provided as-needed production support

DPRA, January 2014 - July 2014

Java Developer

- Ensured a smooth transition from an original federal contractor to newly awarded CACI for the DPS program. I assisted in standing up infrastructure technologies while providing as-needed analysis for production support issues.

Savvis, December 2012 - December 2013

Associate Engineer

- I provided junior-level system administration support for clients using the company's cloud computing and hosting services. I helped support multiple Fortune 500 companies accomplish their goals and meet established SLA expectations.

Small Business:

Orban Properties & Leasing, LLC, July 2011 – January 2022

- Co-owned and managed 9 residential rental units in Alton, Illinois. Utilized and refined skills in property management that allowed us to be successful for over 10 years.

Education:

Bachelor of Science in Software Development, Bellevue University, Omaha, NE, June 2023

Certifications:

- [AWS Certified Cloud Practitioner](#)
- [CompTIA Security](#)
